About

I started my career in software development in 2014 with the C++ language, working in robot programming, machine safety devices and 3D modeling software.

Since 2016 I migrated to C# language, most of my work on the ASP.Net Core platform with WebApi library.

During this period I developed ERP software for tax and accounting, hospital management systems and health plans, and lately working as a Fullstack Developer using Angular framework on the frontend in applications for managing contracts with banking system customers. I am always looking for new challenges, I keep in constant contact with new technologies in order to consolidate and expand my knowledge.

Experience

Itaú Unibanco / Fullstack .Net Developer | Angular

SINCE AUGUST 2021, SÃO PAULO

Work in the bank credit recovery team. The main activities are:

- Development of microservices on the .NET Core platform.
- Frontend development using Angular 9+.
- Creation and integration with REST APIs.
- MSSQL Server and MongoDB database.

Totvs SA / Software Development Analyst

NOVEMBER 2019 - AUGUST 2021, SÃO PAULO

Work in the Health Plan team in compliance with a series of Brazilian legislation imposed by the ANS. The main activities are:

- Test-oriented backend development (TDD) in AdvPL (TOTVS Proprietary Language).
- ETL modeling for Big Data (using the GoodData platform).
- Creation and integration with REST APIs.
- Front End Development (Angular/TypeScript).
- MSSQL Server and PostgreSQL database.
- Technical documentation using OpenApi library.

Grupo Módulos / Software Development Analyst

DECEMBER 2016 - NOVEMBER 2019, SANTO ANDRÉ

Work in an ERP system for small and medium-sized companies integrated with an NF-e / NFS-e issuer.

- Backend development using C# / .NET.
- SOLID and DDD
- ORM Tools (Entity Framework)
- Consumption of SOAP/REST Web Services from the Internal Revenue Service.
- Stored Procedures in SQL Server DB.

ESS Engenharia de Sistemas de Segurança/ Systems Designer
MAY 2014 - MARCH 2016, SÃO CAETANO DO SUL
Programming of robots and devices using C++ to meet safety standards (NR-12)
Integration between software via API using REST architecture.
Automation and process optimization projects.
Autodesk Inventor software mechanical design and consulting.
